

US Thin Patch V/O

Repair Mortars

Vertical and Overhead Polymer Mortar

US THIN PATCH V/O, is a modified Portland cement based repair mortar containing an *integral corrosion inhibitor* and dry polymer for added tensile, bond and flexural strengths. US THIN PATCH V/O is ready to use, requiring only jobsite addition of potable water.

U. S. Thin Patch V/O can be used on:

- Bridges & Tunnels
- Balconies & Parking Decks
- Manholes & Sewers
- Piers & Bulkheads
- Elevated Concrete Slabs
- Slabs on Grade

- Advantages:**
- High Bond Strength
 - Excellent Freeze Thaw Durability
 - Fast Setting
 - Easy Mixing and Placement
 - Shrinkage compensated
 - Excellent finishing characteristics.
 - Low Permeability and high bond strength
